

SOLUTION PROFILE

SCRAP and RECLAMATION INDUSTRY

As a Scrap and Reclamation business, your challenge is to acquire, safeguard, and turn over a large amount of constantly changing inventory items. CounterPoint SQL offers a completely customized technology solution - software, hardware, and tailored technical services - that can help you and your business meet the increased industry demands and regulations to drive growth and profitability for your business.

With CounterPoint SQL's technology, you will have the tools available to ensure your inventory is accounted for and secure, provide speedy product receivings and turnaround sales, and ensure all of your industry's regulatory guidelines are met. CounterPoint SQL delivers all of these capabilities and much more in a technology package that is easy to implement and affordable for Scrap and Reclamation businesses of any size. Join the many Scrap and Reclamation business owners who currently rely on CounterPoint SQL today and advance your operations to a new level.

- **EXPAND YOUR HORIZONS**
CounterPoint SQL works for Scrap and Reclamation operations of all sizes. No matter how big your business gets, CounterPoint SQL will deliver consistent performance across your entire organization.
- **SIMPLIFY YOUR LIFE**
CounterPoint SQL's approach to technology is simple - an all-inclusive system to run every aspect of your Scrap business from one source.
- **BOOST YOUR BOTTOM LINE**
Safeguard and manage your valuable inventory investment to maximize your business profitability.
- **MAKE PROFITABLE DECISIONS**
CounterPoint SQL lets you get to the heart of your data so you can view it, export it, and manipulate it just about any way you want.
- **ACCELERATE YOUR BUSINESS**
Streamlined point-of-sale means faster receivings and transactions with fewer errors, on-the-fly data entry lets you add records from anywhere in the system, and data-driven lookups help you locate those records in a flash.
- **PROTECT YOUR INVESTMENTS**
As part of the all-in-one solution, CounterPoint SQL registers allows for direct interfacing with a comprehensive security camera system to help keep watch over your inventory and other business investments.

IDEAL FOR THE SCRAP / RECLAMATION ENVIRONMENT

CounterPoint SQL's reliable and durable hardware can be put to the test.

- Point-of-sale registers contain sealed cases to keep out dirt and dust
- Tough touchscreen monitors allow for high-frequency transactions

FULL SERVICE POINT-OF-SALE FUNCTIONALITY

CounterPoint SQL offers all of the transactional options you need through one system.

- Ability to collect customer and vendor information to be stored with each transaction - names, addresses, driver licenses (scanned image of license) and other essential transactional elements

- Print out checks to customers or vendors directly from the point-of-sale register
- Touchscreen interface makes it very easy for non-technical users

- Security camera system integrates with point-of-sale registers

- Send and receive faxes at point-of-sale via the internet
- Gross Ton Pricing is EXTREMELY accurate. CounterPoint SQL will calculate the price-per-pound and total price without losing any accuracy using Gross Ton Pricing.
 - Most systems are unable to do this because of a four digit decimal place limit for pricing. With CounterPointSQL, Gross Ton Pricing is calculated using ten decimal places to ensure increased accuracy.
